AMANTUS COMPASS: HOW TO FOLLOW THE SIGNALS

GOLD (XAUUSD) SIGNALS · TELEGRAM @AMANTUS_COMPASS

Every signal is one trade and three numbers: entry price, **T/P** target and **S/L** stop. We open every trade at the broker first and only then publish it — so every trade can be verified on our account.

1 **Subscribe**
Telegram @amantus_compass — turn on notifications and pin the channel: signals live for minutes.

2 **Get a signal**
🟢 LONG — buy, 🔴 SHORT — sell: entry price, T/P and S/L.

3 **Open the trade**
Right away, at market, with the T/P and S/L from the signal. Size — 0.01 lot per $1,000 of capital.

4 **Wait for the close**
The trade closes by itself at T/P or S/L — we post the result as a reply to the signal.

5 **Verify**
Every trade is on our broker account: amant.us/investor and amant.us/myfxbook.

What the messages look like

All in English, time — Central European (CEST in summer, CET in winter).

STOP OR REVERSAL

The trade hit its stop — it happens, it is part of the system. (Example.)

⚪ **CLOSE** — the signal has reversed: close the open trade at market.

Entry timing is critical. Entering at a worse price than stated is at your own risk: better to skip a trade than to lose money. Holding longer than T/P? Move your stop to breakeven once the price reaches T/P.

Other messages

Less frequent, but worth knowing.

⚠️ Signal levels T/P 4166.00, S/L 4188.00
not set — shown as on broker's account

LEVELS AS AT THE BROKER

The post always shows the T/P and S/L actually set on our trade. Usually they differ from the signal by cents.

The ⚠️ line is a rare case when the levels could not be corrected: the signal levels are shown below. Set them as in the post. (Example.)

No trade, no signal. Every post is a trade already open on our account at the broker. If it did not open, there is no post.

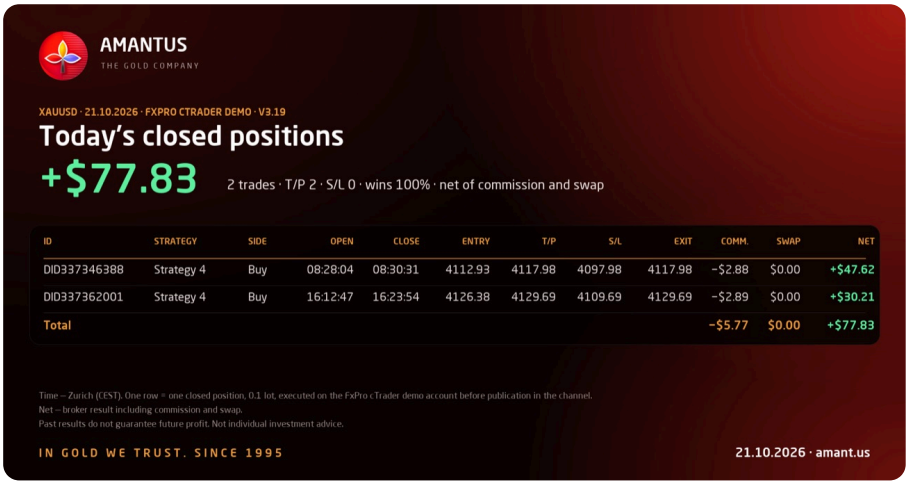

Everything is verifiable — and what to expect

EVERY TRADE IS AT THE BROKER

We first open the trade on an FxPro cTrader account (currently a demo account), set the exact T/P and S/L, and only then publish the signal — with the fill price, fill time and position number. We never edit published signals afterwards.

RESULTS

All channel results are on Myfxbook: **amant.us/myfxbook**. The statistics are built from our account at the broker and are always up to date.

POSITION SIZE AND RISK

- **0.01 lot per $1,000** of capital per signal (our account: 0.1 lot on $10,000); at first you can trade half of that.
- The system is designed for capital of $10,000 or more. Past results do not guarantee future profits.

Access from 1 January 2027

The channel is free until 31.12.2026. After that — one of two options, honest and simple:

$99 per month

OPTION 1. SUBSCRIPTION

Paid from your own pocket through a payment service; we will share the payment link after 01.01.2027. No free trials and no refunds.

$0 extra cost

OPTION 2. AN FXPRO ACCOUNT VIA OUR LINK — RECOMMENDED

Trade the signals on your own FxPro account with **$10,000 or more**, opened via **amant.us/ib**. The broker shares part of its commission with us — about 40%: trading the signals, that is roughly the same $100 a month, but **you will not notice it** — your costs do not increase, the spread is the same.

WHY $10,000 OR MORE

The system is stable at 0.1 lot per signal — that is about $10,000 of capital. With less capital, trading becomes unstable: too little room for drawdowns. We want both you and us to keep earning — so that everything is fair. For serious trading, $10,000 is not a lot of money.

HOW TO SWITCH WITHOUT HASSLE

1. **Today**, open an account via **amant.us/ib**.
2. Send us the account number via **amant.us/contact** — we will verify it.
3. On **1 January 2027** your access continues automatically. If you choose the subscription, you will get a $99 payment link.
